CORE SKILLS

- Full-stack architecture
- REST & GraphQL API design
- Database design & optimisation
- Cloud infrastructure (AWS/GCP)
- Serverless & container deployment
- Agile / Scrum workflows
- Code review & mentoring
- Remote async collaboration
- Technical documentation

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building scalable, high-performance web applications. Proficient across the entire development lifecycle — from UI design and front-end implementation to API architecture, database design, and cloud deployment. Passionate about clean code, developer experience, and shipping products that users love.

EXPERIENCE

Senior Full-Stack Developer

REMOTE

Jan 2022 – Present

Nexlayer Inc. · San Francisco, CA (Remote)

Led full-stack development of a B2B SaaS platform serving 50,000+ users, working within a fully distributed team of 12 engineers across 5 time zones.

- Architected and built a React + TypeScript frontend with Next.js, reducing page load time by 42%.
- Designed and implemented RESTful and GraphQL APIs using Node.js and Express, handling 2M+ requests/day.
- Migrated legacy monolith to microservices architecture using Docker and Kubernetes on AWS EKS.
- Built real-time collaboration features using WebSockets and Redis pub/sub, supporting 500+ concurrent users.
- Established CI/CD pipelines with GitHub Actions, reducing deployment time from 45 minutes to under 8.
- Mentored 3 junior developers through code reviews, pair programming, and async technical documentation.
- Improved PostgreSQL query performance by 60% through indexing strategy and query optimisation.

Full-Stack Developer

REMOTE

Mar 2019 – Dec 2021

Orbify Digital · Austin, TX (Hybrid → Remote)

Worked across a range of client projects delivering custom web applications for e-commerce, fintech, and media clients, transitioning to fully remote delivery from mid-2020.

- Built and maintained Vue.js frontends for 8 client projects, from MVP to production.
- Developed Python FastAPI backends with PostgreSQL and MongoDB for data-heavy applications.
- Integrated third-party APIs including Stripe, Twilio, and SendGrid across multiple projects.
- Implemented JWT-based authentication and role-based access control for a fintech client platform.
- Reduced infrastructure costs by 35% by migrating from on-premise servers to GCP Cloud Run.

- Delivered full-stack features end-to-end in a two-week Agile sprint cycle with async standups.

Junior Web Developer

Jun 2018 – Feb 2019

BrightPath Studios · Oakland, CA

Entry-level role building responsive websites and internal tools for small business clients using HTML, CSS, JavaScript, and PHP.

- Developed responsive marketing websites for 15+ clients using HTML5, CSS3, and JavaScript.
- Built internal CRM tool using PHP and MySQL, reducing manual data entry by 4 hours per day.
- Collaborated with designers to implement pixel-perfect UI from Figma mockups.
- Maintained and updated WordPress sites, implementing custom themes and plugins.

EDUCATION & CERTIFICATIONS

- **AWS Certified Cloud Practitioner** 2024
Amazon Web Services · Verified Credential
- **AWS Academy Graduate — Cloud Foundations** 2024
Amazon Web Services Training & Certification · Verified · credly.com/badges/909c53a6
- **Meta Front-End Developer Certificate** 2021
Coursera / Meta
- **JavaScript Algorithms & Data Structures** 2020
freeCodeCamp · Verified Certificate
- **Responsive Web Design Certification** 2019
freeCodeCamp · Verified Certificate
- **CS50x: Introduction to Computer Science** 2019
Harvard University / edX · Verified Certificate

PROJECTS

TaskFlow — React · Node.js · PostgreSQL · LocalStorage

Full-featured Kanban task manager with drag-and-drop cards, priority tagging, progress tracking, and real-time stats. Supports multiple columns and persistent storage.

■ github.com/hybeekraft/taskflow

MintFlow — Vanilla JS · Chart.js · LocalStorage

Personal finance dashboard with income/expense tracking, budget limits, 6-month bar chart, and category breakdown. Fully client-side with persistent data.

■ github.com/hybeekraft/mintflow

Skye Weather — HTML · CSS · JavaScript · Weather API

Animated weather dashboard with 7-day forecast, hourly timeline, UV index, air quality, sunrise/sunset arc, and multi-city search with unit toggle.

■ github.com/hybeekraft/skye-weather

Quill CMS — Vanilla JS · Lora Typeface · LocalStorage

Minimal blog content management system with rich post editor, live preview, draft/publish workflow, tag filtering, category management, and stats dashboard.

■ github.com/hybeekraft/quill-cms

KEY ACHIEVEMENTS

- Delivered a real-time collaboration platform serving 50,000+ users with 99.9% uptime over 18 months.

- Reduced cloud infrastructure costs by 35% through GCP Cloud Run migration and resource optimisation.
- Cut CI/CD deployment time by 82% (45 min → 8 min) through pipeline optimisation and caching strategies.
- Open-source projects accumulated 1,500+ combined GitHub stars with active contributor communities.
- Mentored 3 junior developers, two of whom were promoted to mid-level within 12 months.

WHAT I BRING TO REMOTE TEAMS

I thrive in async-first, distributed environments. I write detailed documentation, communicate proactively across time zones, and take ownership of features from design through deployment without hand-holding. I use structured tools (Notion, Linear, Slack, Loom) to stay aligned and keep teams unblocked.

- Experienced with async-first communication and overlap-hour collaboration.
- Strong written communication — detailed PRs, thorough docs, clear status updates.
- Self-directed and proactive — comfortable owning features end-to-end remotely.
- Reliable and timezone-flexible — available for overlap with US, EU, or APAC teams.
